GRS RECYCLED POLYESTER

HEAT-SEALED CHEVRON SEGMENTED TAPE

CERTIFIED UP TO 50 MACHINE WASHES

DESCRIPTION

Blackrock's Eco Hi-Vis T-Shirt has been designed using GRS certified 150gsm recycled polyester, re-using 16 plastic bottles per garment. 2 bands and 2 braces of heat-applied chevron segmented retro-reflective tape are certified to EN20471 Class 2, whilst the fluorescent orange colour conforms to RIS-3279-TOM rail industry standards. The upgraded design achieves UPF40+ protection, blocking out 98% of UV rays. The fluorescent fabric has been enhanced to remain fully certified for up to 50x machine washes.

CERTIFICATION

EN ISO 20471: 2013

ISO 20471:2013 High-Visibility Clothing is an international standard which specifies requirements for high visibility clothing capable of visually signalling the user's presence.

High visibility clothing is grouped into three classes related to risk assessment. The classes are determined by three different minimum areas of retroreflective, fluorescent and/ or combined performance material.
A class three garment offers the highest degree of visibility.

Users should select the required class of performance based on a risk assessment of the location/situation.
